Forecast for Monday 07 Aug 2023

Weather: Some patchy low cloud may develop during the early hours, and a few pockets of mist and fog may form in the valleys by dawn. This will soon clear through the morning to leave a generally dry day with sunny spells. Skies probably turning cloudier by the afternoon and thickening cloud may bring a few spots of rain or drizzle later in the evening.

Chance of cloud-free hill tops above 600m: 60% becoming 90%.

Low cloud and visibility: Patchy cloud above 500-600m at first, clearing by mid-morning, then all cloud above the summits until after dark when periods developing above 600-700m. Very good visibility for most of the day with distant hills and landmarks clear to see. Some poor visibility first thing on the summits (and in any valley fog) and turning locally poor in any mist/drizzle late in the evening.

Meteorologist's View

A fine day for hill walking by and large with lighter winds than over the weekend and good views. Remember the sun protection though with high UV levels expected.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sat 05 Aug 2023	15.8mm	15.8mm	16mm

Forecast for Tuesday 08 Aug 2023

Weather: A pretty grotty and murky morning with extensive low cloud, mist and hill fog. Damp at times too with occasional light rain and drizzle. Probably brightening up by the afternoon with the cloud breaking to give some sunny intervals, but a continuing chance of a few light showers or pockets of drizzle.

Maximum wind: Southwest 20-25 mph gusting 30-35 mph easing to Northwest 15-20 mph

Chance of cloud-free hill tops above 600m: 10% improving to 40% by noon and 80% by the evening.

Low cloud and visibility: Widespread extensive cloud above 300-400m through the morning will give very poor visibility over the hills and occasionally poor visibility at lower levels during periods of drizzle. Cloud breaking to periods above 600m by noon and patches above 700m by mid-afternoon with visibilities becoming mostly good or very good.

Temperature: **Valleys:** Plus 12 Celsius rising to plus 20 Celsius.
At 600m: Plus 13 Celsius.
Freezing level: Well above the summits.
